INVESTMENT PRINCIPLES

Fusion Active portfolios are designed for investors who believe that manager's skill in utilising short-term market opportunities and market timing can increase returns.

The range starts with a systematic Strategic Asset Allocation which aims to maximise expected long-term return within well-defined risk parameters. Medium-term market forecasts and short-term tactical tilts are overlaid to exploit current market trends and economic opportunities to derive the Tactical Asset Allocation. This is implemented using actively managed funds, selected from a range of well-established providers who aim to consistently out-perform their benchmarks.

RISK SCORE

MARKET COMMENTS

June marked the end of the second quarter with another positive month for portfolio performance, with global equities rising 2.8% and bonds also rising by 0.9% in GBP terms.

Global stocks rose to fresh highs, although this was again largely driven by the US market (+4.3%), and in particular, its AI-related mega-cap names in theme which fails to dissipate. In fact, global stocks excluding the US were flat in June, as was the equal-weighted US index. Emerging markets (+4.8%) outperformed developed markets, driven by the two large semiconductor-intensive nations, Taiwan and Korea, outperforming significantly, up 13% and 9% respectively. Several developed-market central banks began their easing cycles in June, including the European Central Bank which unsurprisingly cut its deposit rate. However, this failed to have its desired effect on markets, as news of a surprise snap French election dominated headlines and fuelled uncertainty. Days after President Macron's announcement, we saw the main French index down by more than 6%, wiping out the majority of gains year to date. This risk-off sentiment was also mirrored in the bond market with the spread between the French and German 10-year government bond yields, seen as a barometer for the risk of holding France's debt, reaching its highest point since February 2017. European equities ended the period -1.7% down.

Commodity prices fell slightly in June, particularly industrial metals and agriculture, however oil rebounded by 6%, benefiting energy positions.
