

Fusion ProActive Planet 3

Factsheet | 01 Apr 2025

PORTFOLIO SUMMARY

- Medium-to-high risk portfolio within the ProActive Planet portfolio range
- Suited for investors seeking long-term capital growth
- Well-diversified portfolio of equities and bonds, with a focus on growth assets and moderate losses during market downturns
- Combines a systematic asset allocation with ESG active fund manager expertise for market timing and individual asset selection

PORTFOLIO INFORMATION

Inception Date	Sep 2021
Investment Horizon	At least 5 years
Total Ongoing charges for underlying funds	0.37%
Management Charge	0.20%

INVESTMENT PRINCIPLES

Fusion ProActive Planet portfolios use a systematic Strategic Asset Allocation approach shared across Fusion Active and Fusion Optima portfolios. The goal is to maximize long-term returns while managing risk. The allocation is adjusted with medium-term market forecasts to incorporate current trends. Fusion Portfolios select components from established providers to outperform benchmarks.

In the Fusion ESG offering, the selected portfolio components are screened to ensure that they have high ESG ratings, provided by MSCI. MSCI ESG fund ratings aim to measure the resilience of funds to financially material environmental, societal and governance (ESG) risks. Where the fund is not rated by MSCI, additional third-party ratings providers are used.

RISK SCORE

Based on our internal analysis, our Investment Team believes this portfolio corresponds to the following risk levels of external risk profiling tools:

DT	Defaqto	Synaptic
5	5	6

MARKET COMMENTS

The first quarter of 2025 finished with a negative month for overall portfolio performance, as global equities declined 6.7% and bonds also delivered a negative return of 1.8% (GBP terms). Global stock markets came under pressure in March amid growing concerns about the economic impact of President Trump's tariff policy. Following the imposition of new tariffs on US imports from Mexico, Canada and China in February, the US administration announced new tariffs on steel, aluminium and autos, while shifting expectations around the severity of pending tariff announcements due on 2 April drove swings in market sentiment with the prospect of a global trade war looming. US equity markets reacted negatively (-8.2%) as trade tensions and weakening consumer sentiment reignited fears of a US downturn. The Fed cut its growth forecast, warning that Trump's tariffs were driving up prices as long-term inflation expectations reached a 32-year high.

The more confrontational approach from the new US administration has had a galvanising impact on European policymakers, with large defence and infrastructure spending packages announced. Despite falling 2.5% in March, European equities have significantly outperformed their US peers over the first quarter (EU +7.5%, US -7.15%). Emerging market equities outperformed their developed counterparts over the month (-1.8%), with Indian equities (+6.5%) rebounding on the back of growth and rising domestic demand. Commodities provided some diversification benefits for investors, with the broad index rising 1%, as once again gold shone as a top performer (+7%).

*The performance figures in this report are based on the live performance of the portfolio since September 2021. Performance before this date is simulated by applying models and algorithms currently used in the construction of this portfolio. The benchmark is the Aviva Multimanager 40-85% Fund which has one of the lowest tracking errors with the IA Mixed investments 40-85 index. Performance prior to June 2014 is reconstructed from the index performance.

Past performance is not a reliable indicator of future results. The value of any investment and the income from it is not guaranteed and can fall as well as rise, so that you may not realise the amount originally invested. The performance figures, portfolio components and the corresponding fund fees vary slightly between different investment platforms, depending on the availability of funds. The portfolio components and all the figures presented in this factsheet are based on the portfolio available on the Aviva platform. Where an investment is denominated in a currency other than sterling, changes in exchange rates between currencies may cause investment values or income to rise or fall. The portfolios may invest in funds or other financial products which have limited liquidity, or which individually have a relatively high-risk profile and/or be unregulated by the Financial Conduct Authority (FCA). This document is issued and approved by Fusion Asset Management LLP ("Fusion"), which is authorised and regulated by the FCA (FRN: 401334).
