

PORTFOLIO SUMMARY

- High risk portfolio within the Active portfolio range
- Suitable for investors pursuing long-term capital appreciation despite the risk of significant temporary losses
- Primarily allocated to high growth/high risk assets diversified across risk types and regions, with protective funds to mitigate major market downturns
- Systematic strategic asset allocation, active management, and diverse assets aim to enhance long-term performance through market timing and selection expertise

PORTFOLIO INFORMATION

Inception Date	Dec 2019
Investment Horizon	At least 7 years
Total Ongoing charges for underlying funds	0.31%
Management Charge	0.20%

INVESTMENT PRINCIPLES

Fusion Active portfolios are designed for investors who believe that manager’s skill in utilising short-term market opportunities and market timing can increase returns.

The range starts with a systematic Strategic Asset Allocation which aims to maximise expected long-term return within well-defined risk parameters. Medium-term market forecasts and short-term tactical tilts are overlaid to exploit current market trends and economic opportunities to derive the Tactical Asset Allocation. This is implemented using actively managed funds, selected from a range of well-established providers who aim to consistently out-perform their benchmarks.

RISK SCORE

Based on our internal analysis, our Investment Team believes this portfolio corresponds to the following risk levels of external risk profiling tools:

DT	Defaqto	Synaptic
7	7	8

MARKET COMMENTS

Holidaymakers didn't miss too much action as August was a relatively flat month for overall portfolio performance, with global equities rising 0.5% yet global bonds retreating -0.6% in GBP terms. The month's top performing region was Japan (+4.8%), where markets were buoyed by the US-Japan trade deal towards the end of July, combined with supportive economic growth data. Significant news came from the US (-0.1%), where a weak labour report featured a steep decline in job creation. The Federal Reserve Chair noted this could justify a change in policy stance, increasing the market's expectations of an interest rate cut at its mid-September meeting. Technology slightly underperformed over the period. While the sector has had an exceptional year, some of that momentum might have been at least temporarily short-circuited by a report from the Massachusetts Institute of Technology that found 95% of corporate AI projects failed to deliver a financial return, questioning the validity of sky-high valuations.

In the UK, the Bank of England cut interest rates to 4%. However, gilts came under further pressure following another upside surprise to inflation, casting doubt on the likelihood of further imminent cuts. Longer-dated gilts also underperformed, with the UK 30-year government bond yield reaching 5.6% (its highest level since 1998) driven by thin liquidity and ongoing fiscal sustainability concerns. Emerging market equities (-0.6%) underperformed, despite strong gains in Latin America (+6.5%) and China (+4%), where US-China trade talks resulted in another 90-day pause on tariffs. Indian markets (-3.5%) were challenged by rising US tariffs, which have increased to 50% in an attempt to discourage its purchasing of Russian oil, and foreign equity outflows.

PERFORMANCE

CUMULATIVE PERFORMANCE

	1m	3m	1y	3y	5y	SI

Past performance is not a reliable indicator of future results. The value of any investment and the income from it is not guaranteed and can fall as well as rise, so that you may not realise the amount originally invested. The performance figures, portfolio components and the corresponding fund fees vary slightly between different investment platforms, depending on the availability of funds. The portfolio components and all the figures presented in this factsheet are based on the portfolio available on the Aviva platform. Where an investment is denominated in a currency other than sterling, changes in exchange rates between currencies may cause investment values or income to rise or fall. The portfolios may invest in funds or other financial products which have limited liquidity, or which individually have a relatively high-risk profile and/or be unregulated by the Financial Conduct Authority (FCA). This document is issued and approved by Fusion Asset Management LLP ("Fusion"), which is authorised and regulated by the FCA (FRN: 401334).
