INVESTMENT PRINCIPLES

Fusion ProActive Planet portfolios use a systematic Strategic Asset Allocation approach shared across Fusion Active and Fusion Optima portfolios. The goal is to maximize long-term returns while managing risk. The allocation is adjusted with medium-term market forecasts to incorporate current trends. Fusion Portfolios select components from established providers to outperform benchmarks.

In the Fusion ESG offering, the selected portfolio components are screened to ensure that they have high ESG ratings, provided by MSCI. MSCI ESG fund ratings aim to measure the resilience of funds to financially material environmental, societal and governance (ESG) risks. Where the fund is not rated by MSCI, additional third-party ratings providers are used.

MARKET COMMENTS

Holidaymakers didn't miss too much action as August was a relatively flat month for overall portfolio performance, with global equities rising 0.5% yet global bonds retreating -0.6% in GBP terms. The month's top performing region was Japan (+4.8%), where markets were buoyed by the US-Japan trade deal towards the end of July, combined with supportive economic growth data. Significant news came from the US (-0.1%), where a weak labour report featured a steep decline in job creation. The Federal Reserve Chair noted this could justify a change in policy stance, increasing the market's expectations of an interest rate cut at its mid-September meeting. Technology slightly underperformed over the period. While the sector has had an exceptional year, some of that momentum might have been at least temporarily short-circuited by a report from the Massachusetts Institute of Technology that found 95% of corporate AI projects failed to deliver a financial return, questioning the validity of sky-high valuations.

In the UK, the Bank of England cut interest rates to 4%. However, gilts came under further pressure following another upside surprise to inflation, casting doubt on the likelihood of further imminent cuts. Longer-dated gilts also underperformed, with the UK 30-year government bond yield reaching 5.6% (its highest level since 1998) driven by thin liquidity and ongoing fiscal sustainability concerns. Emerging market equities (-0.6%) underperformed, despite strong gains in Latin America (+6.5%) and China (+4%), where US-China trade talks resulted in another 90-day pause on tariffs. Indian markets (-3.5%) were challenged by rising US tariffs, which have increased to 50% in an attempt to discourage its purchasing of Russian oil, and foreign equity outflows.
