MARKET COMMENTS

Despite both global equities and bonds retreating slightly in December (-0.7% and -1.2% respectively, GBP terms), our portfolios managed to deliver a marginally positive return over the month. This capped off an excellent year of performance, as risk-on sentiment drove an "everything rally" from the April lows resulting in 2025 marking the first year since the pandemic where all major asset classes delivered positive returns.

US equities (-1.5%) dipped for sterling investors in December, as technology enthusiasm cooled and dollar weakness amplified losses. In contrast, European markets ended 2025 on a positive note. European shares rose 2.4% as investors rotated away from expensive US tech names into more attractively valued sectors such as banks, defence, energy, and mining. Similarly, UK stocks rose 2.4% on strong mining and defence gains and rate-cut optimism, contributing to an impressive 25.7% gain for the year. This regional divergence echoed a wider trend throughout the year. US equities enjoyed a robust year, but global markets truly stole the show. In sterling terms, world ex-US equities rose an impressive 23.27%, comfortably eclipsing the more modest 9.34% advance of US equities. Emerging markets (+1.2%) also ended the year positively, driven by strong Asia Pacific performance, buoyed by AI-driven semiconductor demand in Korea (+10.1%) and Taiwan (+5.5%). Precious metals were the standout asset class of 2025, with gold grabbing the headlines as central banks continued to diversify their reserve holdings. However, it was silver which stole the show in December, rallying 22%. Strong performance from precious metals offset falling oil prices, lifting overall commodities returns to 15.8% in 2025.
