INVESTMENT PRINCIPLES

Fusion ProActive Planet portfolios use a systematic Strategic Asset Allocation approach shared across Fusion Active and Fusion Optima portfolios. The goal is to maximize long-term returns while managing risk. The allocation is adjusted with medium-term market forecasts to incorporate current trends. Fusion Portfolios select components from established providers to outperform benchmarks.

In the Fusion ESG offering, the selected portfolio components are screened to ensure that they have high ESG ratings, provided by MSCI. MSCI ESG fund ratings aim to measure the resilience of funds to financially material environmental, societal and governance (ESG) risks. Where the fund is not rated by MSCI, additional third-party ratings providers are used.

MARKET COMMENTS

February provided positive returns for portfolios, as global equities (+2.8%) climbed to a fresh record high. Market leadership broadened as investors continued to rotate away from mega-cap US technology, as enthusiasm is giving way to a more disciplined reassessment of valuations and the sustainability of returns. The market punished AI hyperscalers for announcing yet more seemingly unjustified capital expenditure and the large size of these companies proved a headwind for US equities (+1.1%), which lagged global markets. Investors gravitated toward 'heavy-asset, low-obsolence companies', and sectors such as materials, energy and utilities outperformed - particularly those that stand to benefit from the ongoing AI buildout, such as manufacturers in Asia (+7.8%) and raw material exporters in Latin America (+5.8%).

Japanese markets (+10.8%) reacted positively to the election victory for Prime Minister Takaichi, who delivered the first two-thirds supermajority since WW2 and investors factored in the increased likelihood of further fiscal stimulus. UK equities (+7%) also performed strongly, driven by their favourable sector mix that benefitted from both the AI rotation and concerns about rising oil prices. Global bonds (+3.2%) benefitted as investors looked to high quality assets amid the growing AI and geopolitical concerns while signs of cooling inflation pressures were well received. Finally, geopolitical angst took hold as tensions between the US and Iran escalated into armed conflict, though hostilities started after markets had closed for the month. We continue to monitor the situation vigilantly and remained poised to adjust portfolios accordingly.
