INVESTMENT PRINCIPLES

Fusion Champions portfolios are built using the least correlated combination of the best performing multi-asset funds corresponding to the specified risk level. This results in diversification among the best solutions across the industry, with expertise in monitoring and oversight provided by Fusion.

The Champions range is designed for investors who seek exposure to the 'best in class' multi-asset funds and trust in the skill of leading fund managers, yet appreciate the benefits that diversification brings, particularly across investment strategies and philosophies.

RISK SCORE

MARKET COMMENTS

Global markets brushed aside a noisy backdrop in August, delivering a positive month for investors, with global equities rising 1.8% and bonds only marginally detracting from overall performance (-0.3%, GBP terms). The US led the way (+2.1%) as strong corporate results, particularly from technology giants such as Nvidia, boosted optimism around the AI investment cycle. Encouragingly, market gains broadened beyond large technology stocks, with financials, industrials, healthcare and energy companies also attracting investor interest. Japan was a standout performer (+2.8%), as investors welcomed continued corporate governance reforms, higher dividends and a growing focus on shareholder returns. The UK lagged peers, as the main index remained flat (+0.2%). However, there were encouraging signs beneath the surface, with smaller UK companies continuing to outperform (+4.3%) as investors responded to improving economic growth and attractive valuations. Asian equities (+2.8%) delivered positive returns, supported by solid corporate earnings and continued investment in AI and digital infrastructure. China's (-0.8%) stock market bounce proved to be short-lived, with August's activity data highlighting ongoing domestic demand weakness.

Bond markets delivered mixed returns, with corporate bonds, supported by strong fundamentals, generally outperforming government bonds. Inflation concerns, fiscal pressures, increased issuance and shifting central bank expectations pushed long-dated government bond yields to multi-year highs across the US, UK, eurozone and Japan. Commodity markets (+6.7%) rallied over the month. Gold (+9.5%) was a top performer, benefiting from demand for safe-haven assets and concerns about inflation, while agricultural commodities (+11.7%), particularly wheat, rose on supply disruption worries and adverse weather conditions.
